

Invitation

Seminar: Medicines in waste water; boomerang or no problem?

Wednesday March 11, 2015

Location: UMCG, Groningen

Dear sir, madam,

Wetsus and UMCG are happy to invite you to the seminar Medicines in waste water: boomerang or no problem? This seminar is organized on behalf of the completion of the German Dutch Interreg project [Denewa](#) and an inventory study on pharmaceuticals in urban waste water in the city of Groningen*.

We prepared an interesting program with contributions from Germany and The Netherlands addressing the following issues:

- The impact of hospital wastewater on the water cycle in relation to other sources. Results are shown from studies in Oldenburg, Groningen and Sneek.
- Antibiotic resistance in the aquatic environment and the contribution of health facilities to the spread of antibiotic resistance.
- Actions taken by hospitals and technological solutions for waste water treatment.
- Outlook Health-i-Care project.

The complete program can be found [here](#).

The registration is now open, please use this [link](#). Participation is for free.

The seminar will be held at UMCG, Groningen and chaired by Prof. dr. Alex W. Friedrich (UMCG) .

For address and route click [here](#). You can use Parking-north or Parking-south.

We're looking forward to welcome you.

* Study of Gemeente Groningen, Waterleidingmaatschappij Drenthe, Waterbedrijf Groningen, Waterschap Hunze en Aa's, Waterschap Noorderzijlvest, Waterlaboratorium Noord, UMCG and Martiniziekenhuis.
